

# YOU CAN KNOW MAJOR WORLD EVENTS IN ADVANCE

To prevent national and international panic, most politicians, economists and scientists are trying to promote optimism during our recent encounters with social, environmental and financial crises. Despite the repeated assurances, we all know deep inside that things are not going well with the world, and that's putting it mildly.

Global warming is intensifying rapidly as competing nations are reluctant to cut carbon emissions; hence our sea level is constantly rising. So also are the divorce and crime rates worldwide, they are also relentlessly rising.

In sheer desperation, some big nations are creating more debts to bail out debt-ridden corporations. It doesn't take a genius to figure out that such a convenient measure will certainly compound the current situation into something horrendous.

So what in the world is happening? Is there any hope for earthlings like us? Where are we all heading? Is the world really coming to an end? Will World War III annihilate our planet? Will all these perplexing crises pave the way for a one world government? These questions, and many more, will be answered in Pastor Rony's messages from 1st February '09 and most of the Sundays thereafter.

Pastor Rony Tan
